16/10/17

Dear Prime Minister,

Well Hon. Bill English, I am writing to you today as a formal introduction of myself the main internet founder I am the person that physically designed the network that the powers be like Vinton Cerf implemented back in the 1980s you will find this dossier on the passport attached to the end of this letter in a series of captured threads and emails pertaining to this done by the then DSD Corp of Australian Defence in the mid+late 1980s from places like UseNet & comp.protocol.

I have been in the chronological nightmare of convulsive historical corridors to many places in fact most haven't at least been stopped in by myself except for New Zealand and I have an opportunity with some pseudofamily based inheritance to travel to your country probably for no more than 2 weeks unless you or your office provide further functional funding and would like to keep myself and quite likely my spouse I will be traveling with who is Elpiniki Iosif DOB: 31/07/1969 who is a Cypriote Australian nationality and we have been married coming on ten years now.

I am not a likely identity to be found in any formal attire like suits and ties tending to smartly casually dressed but I am a proficient public speaker and speech writer which I would be happy if your able to provide the transport from my hotel to attend any formal function and address them, I will just need to know the length approximated of the needed public addressment as well as if slides que cards are available so I can write the functionally diverse and working spokenword for you and your countrypeople.

I originally started in medicine as a sex doctor and last move in profession in this in where I am from is called conscious architecture aka. A psychaitrist → The following masters in IT, Physics and Psychology linking the field of mind sciences + CA with Psychaitary which I am completely qualified as if you check my educational profile on facebook.com under about → education.

The business which is an open business to present I am from if ever need be is the Chronolabs Cooperative which I am the business founder of and the source of the design of the internet networking topologies. I have no trouble in co-ordinating speeches and addresses if you distribute my email address as it is the best method of contacting me, also if you are doing any sort of press release about chronolabs or me then place in the c/c or b/cc the following forwarder: releases@snails.email.

My spouse can drive unlike myself but currently doesn't hold an international or australian drivers license, my spouse is well like a big kid with a temperament of a 6yr old much like you would expect the child buddha to be like, so my spouse would be happy to watch from the wings or part company with me and reunite back at the hotel, I don't actually drink alcohol tending to me be more and ethnobotanical outlet for blowing out the cobwebs or provision of hash info, I eat most things and don't mind finding a quite corner for any personal getting to know you.

You will find linked to my passport is my security clearance which you will find both with the United Nations, US Army and Australia very high and quite float well in any security and intelligence pow-wow on questions and answers placed in queue. My partner is not to attend these such meetings who largely never had a computer before meeting me and is more pre-occupied with shopping or browsing or just sitting around reading.

I wont be travelling with any mobile computing, I am more a desktop computing person never really like laptops or their keyboards but I will be carrying with me a mobile phone which I will when I get a sim in NZ put the number it is down: releases.nz@snails.email for any distribution or people getting in contact with me.

Some of my main links include:

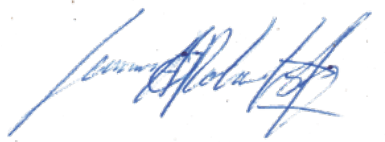

- <http://twitter.com/SimonXaies>
- <http://twitter.com/ChronolabsCoop>
- <http://twitter.com/OpenRend>
- <http://facebook.com/mynamesnot>
- <http://facebook.com/ChronolabsCoop>
- <http://sourceforge.net/projects/chronolabs>
- <http://sourceforge.net/projects/chronolabsapis>
- <http://sourceforge.net/projects/openrend>
- <http://github.com/Chronolabs-Cooperative>
- <http://internetfounder.wordpress.com>

I am also a contributor to open source namely the XOOPS CMS (www.xoops.org) as a ranked member, which is in the LAMP Stack in Linux, namely the desktop I use is called Ubuntu which you can get the ISO from: <http://releases.ubuntu.com>

If I am preparing a speech I am likely to do it on embracing Open Source, the move from Open Gov to getting rid of the word Government all together and replacement of it with Open Rend (Renderments) as well as community aspirances and ideals to migrate from close licence/doored physicality in operating systems in business and government and utilizing the incredible power in open source like Ubuntu in your business/government offices and communities. I never haggle or bring up in public my missing internet design fee's, I just leave that at where it is with deployment in a bit of a to-hard basket case.

So thanks for taking the time reading this letter, I look forward to receiving your planned itnerary for me in NZ, it will be coming late november early december when I come there and I will tweet you my passport number as well as flight serial number so you know when I am arrive and arrival time, we will be flying into wellington.

Best Wishes + Regards,

A handwritten signature in blue ink, appearing to read 'Simon Antony Roberts', written in a cursive style.

Dr. Simon Antony Roberts
Main Internet Founder
