Dr. Alexander Shulgin  
55 Shulgin Road  
Lafayette, CA 94549  
United States of America

27/12/17

To Dr. Alexander Shulgin,

You know over the years I have sent you normally a christmas card each year, but I forgot to this time, after you republished the 900 or so chemical descriptions my Artificial Intelligence system modelled I made once at Creative Software Solutions in Glenhaven, the industrial chemist that operates that business actually fired me over my perfectatron for psychoactive \*.mol developer as it made a cost in making and testing them on a human effect API.

It was basically a program I wrote cause at creative software solution it is digital bubbles, they maintain and write something like a chemical ordering system for industries but with the resource, I wrote an AI that would get inputed \*.mol and it would perfect them with options like:

- No nausea
- No scent
- Vaporisable
- Dissolvable in water
- None evaporating

So the AI would sit there and run computation changes to the \*.mol for the option selected and then once they were all complete post them to alt.drugs and alt.psychadelic.drugs with all the instructions on making the \*.mol on UseNet when it was all done I left it running over the weekend and by sunday had done the posts at the end all at one hit of all kinds of the stuff.

By wednesday I had lost my Job there in that historical corridor but did work there again in support next time around in history it came up basically due to the excessive charges on the \*.mol human body testing API I was using to test the molecule changes to make sure they where all well and good and as the original with substancial changes. DIPT is an example of the perfect version of LSD25 the code DIPT like the other(s) is generated randomly.

Btw. I am writing this letter on just not long ago some MDMA that I took intravenously I had some meth around an hour or two before that so my belly is nice and walm, anyway, so I now have a **Masters through RMIT in 2008** awarded for **IT, Physics + Psychology** making me now also a psychiatrist which is good I have been for a number of years just working in Open Source and community based projects but if you can I would like the text books which you will be able to access via the IT Department of *RMIT* printed through transform press as part of my masters I presented 13 text, and they are all in bundled with artwork and printing markers ready to go to the printer, my main one was an index similar to *T/HKAL + P/HKAL* in part story book but also an index layed out like the *merck index* for molecules to use in pharmacology.

I basically rewrote pharmacology as well as some texts on physics and so on I need all published and I was hoping you could pass this information on to your publisher Transform Press to take me in as alternate chemistry and science text books: 35% goes to medicine san`frontier as donation the rest we divey up. There is also digital media with the chemistry titles, there is multiple volumes in it in formats for LAMP Stacks etc. and so on that goes with the publication (some of them)!

I have two business registered you can find them on <https://abr.business.gov.au> called: Chronolabs & Undo Corporation is the two of them, I have only been operating out of the Chronolabs cooperative the Undo Corporation has basically been sitting in shelf since its conscreation so far for example in my [github.com](https://github.com) resources this is the molecular compounding tool I wrote in PHP for XOOPS 2.5: <https://github.com/Chronolabs-Cooperative/Compounds-Module-Xoops25>.

So what about me, myself, my profile and what I like, well I have been living in Sydney most of my life and I am nearing 40 solar cycles on this set of my passport which the serial number I generate myself which is: M8747409 – DOB: 08/12/1978 (See Image Below); cause I am one of the founders of the internet, I was the person that put the design Vinton Gregory Cerf worked off through implementation by design as a small boy back in the 1980's. I have lived through the early part of my life out of home age 17 and lived from warehouse to country doofimunies and community living as well as boarding houses, where I have been putting myself in that time of moving around through open university routed to rmit and doing it correspondence and so on.

I have since an early age been skilled and maintain current day trends in programming for nearly 30yrs testing and writing environments as well as business operations reporting documenting as well as new article topology. Since 2007 have been a member ofxoops.org and now hold rank on the project of a module developer under the username, wishcraft my other alias is mynamesnot or if special characters are allowed ways|: is one I also have been known to use.

I tend to have never used Apple machintosh or Microsoft windows using open source operating systems in my home and work environments, as I don't need any game intensive graphical environments as an occupational code junky! The OS I is using at the moment and tend too recommend and suggest to people is : Ubuntu - which you can get the ISO from <http://releases.ubuntu.com> to install what I am running Ubuntu 17.04 (32 + 64Bit Enviroments) it has a clean physicality and doesn't drive pedometers unlike the above mentioned, it is a variegate of Debian Linux.

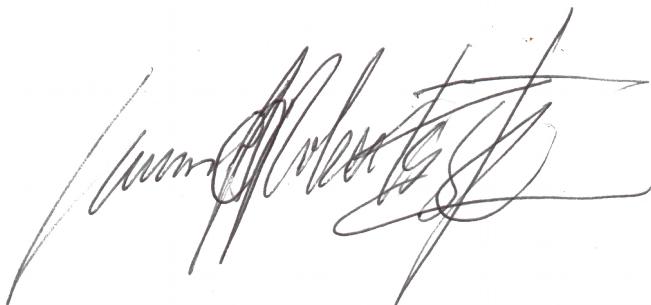

I married around 9yrs ago to a Greek Girl; Elpiniki Iosif (Image Below) and as we are part of the internet community her like me is quiet squeaky clean and clean living together, we only part take in narcotics once every week when my flatmate get paid Neil Watters and that really only cause we don't drink alcohol in anyway, I view it like an infection motor mouth the earliest form of petroleum this alcohol and you get something like foot and mouth disease called motor mouth if you ever really even have it in your physicality and physical environmentals.

We have two cats which are rescue pets the mother of the two, Meow Meow Twerp (MMT - See Photo Below) as well as one of her two daughters that were born before they were all given the snip: Vincent Mozzerella Twerp (VMT - See Photo Below) [the kittens went to Cat Protection Society - Enmore].

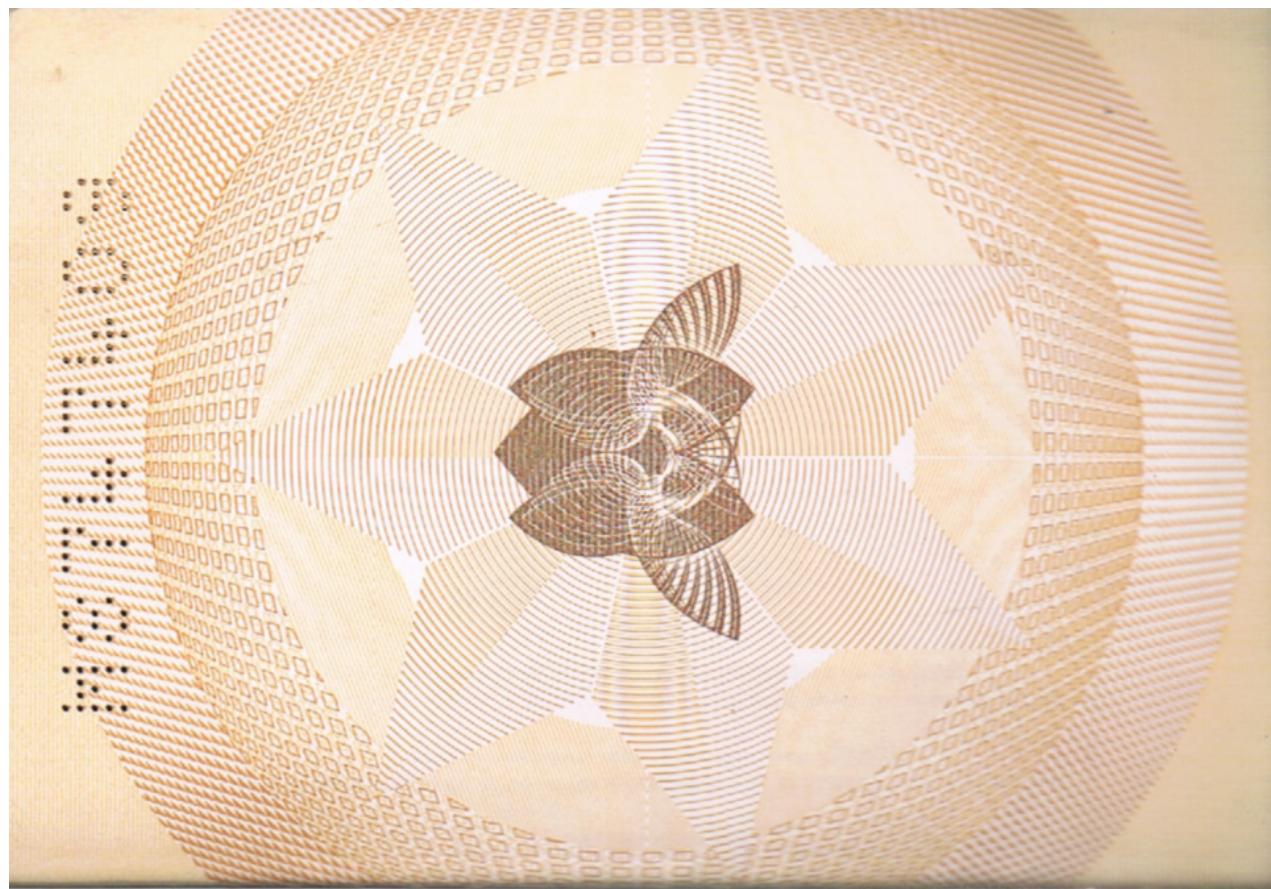

We live in government housing in Marrickville South, NSW, Australia, and have our finances controlled for some reason via my mother-in-law. So we live on both of us an allowance of \$20.00 per day → for some reason my mother-in-law got Elpiniki online shopping habit confused for narcotics, we actually spend little of our money if any on this, part taking in whatever comes by our own place and home (see photos below x 3).

**So well I will leave it about there I know with the amount of reading we all do a breifed tight letter is always a pleasure, I hope to hear some form of correspondence and for me email or twitter (@SimonXaies) is always the best way of reaching me!**

Great kindness & regards,

A handwritten signature in black ink, appearing to read "Dr. Simon A. Roberts".

CERTIFICATE NO. NCHRC-2008-8180

Name: ROBERTS, SIMON ANTONY  
 DOB: 8/12/1978  
 PAGE 1 OF 1

NSW Police Force  
[www.police.nsw.gov.au](http://www.police.nsw.gov.au)  
 ABN 43 408 613 180

SIMON ANTONY ROBERTS  
 5 GARNET ST  
 DULWICH HILL NSW  
 2203

This is to certify that the following "disclosable court outcomes" and outstanding matters are recorded against the name of **ROBERTS, SIMON ANTONY**, born on **8/12/1978**, within the records of police services in Australia.

Court	Court Date	Offence	Outcome
Sydney District Court	10/08/2001	Supply prohibited drug >indict. Quantity (not cannabis)-si	Bond S9 : 1 year accept supervision NSW probation service obey all lawful orders notify registry of any changes to his address drug to be destroyed
Brisbane Magistrates Court	11/10/2005	Contravene Direction Or Requirement	Fined \$200 8 days H.L.
Brisbane Magistrates Court	12/10/2005	Contravene Direction Or Requirement	Fined \$150 2 days H.L.
Brisbane Magistrates Court	21/10/2005	Commit public nuisance  Obstruct police officer  Contravene Direction Or Requirement	Fined \$300 6 days H.L.  Fined \$250 5 days H.L.  Fined \$150 3 days H.L.

END OF RECORD

*Janet*  
 For Manager  
 Criminal Records Section  
 Issued: 27/08/2008

1. This certificate is based upon a check of the National Names Index (NNI) using the name and date of birth of the person referred to above. Given that fingerprints are not taken by police services in Australia in all instances, it is possible that the NNI may contain information recorded against this person under another name or alias.
2. This certificate is issued subject to the various applicable laws, which prohibit the disclosure of spent convictions, except in certain circumstances. Accordingly, the court outcomes disclosed above does not necessarily imply that it is a complete list of convictions or charges in respect of that person.
3. Given that there is an unavoidable time lapse between the recording of convictions by courts and the updating of the NNI, this certificate can only reflect the completeness and accuracy of these systems (subject to the proviso in paragraph 2), at the time of application.
4. Applicants should be given an opportunity to verify the contents of this Certificate.

**SECURITY WARNING**

This document contains several inbuilt security features, some of which are listed below. Please refer to the reverse for a full description of the security features. ■ The pink "Eagle" images on the left and right are printed in a heat sensitive ink and will disappear if moderate heat or friction is applied. ■ The border around this Security Warning is printed in MICROTYPING which reads NSW POLICE FORCE CRIMINAL RECORDS SECTION when viewed under magnification. ■ The document background has a pattern of fine wavy lines and a graduated colour change from blue to pink to blue.

**MOLECULAR BIOLOGY  
CYTOCHROME P450 2D6 GENE TEST**

2D6 Genotype:  
\*1/\*4

Phenotype interpretation: Intermediate metaboliser

**Notes:**

CYP 2D6 alleles tested.

CYP 2D6 \*1,\*2,\*3,\*4,\*5,\*6,\*7,\*8,\*9,\*10,\*17,\*41 and major duplications.

Other rare alleles are known but are not detected in this assay.

Activity of Alleles

Active	:	*1,*2
Partially Active	:	*9,*10,*17,*41
Inactive	:	*3,*4,*5,*6,*7,*8

**INTERPRETATION**

Extensive Metaboliser: Normal phenotypic metabolism. These patients have two active CYP2D6 alleles, or one active and one partially active allele. In general, these patients can receive substrates of the CYP2D6 enzyme using standard dosage procedures.

Intermediate Metaboliser: May require lower than average drug doses for optimal therapeutic response, or may have sub-optimal conversion of drug to active form. These patients have one active and one inactive 2D6 allele, or two partially active alleles.

Poor metaboliser: May be at risk of drug-induced side effects due to diminished drug elimination (eg various antidepressants), or lack of therapeutic response caused by diminished conversion of the drug to active form (eg tamoxifen, codeine, tramadol). These patients have either no active alleles, or only one partially active allele.

Ultra metaboliser: May require higher dosing regimes due to increased rates of drug metabolism. These patients have three or more active
